WHO WE ARE

We, *acchi cocchi* (“here and there” in Japanese), deliver music and arts across Japan and in the world. We were founded in 2011 right after the Great East Japan Earthquake. Our team of more than 70 talented artists, our greatest asset, is committed to social contribution activities. We continue to support young artists and local communities, and we are recognized by the Japanese government for our child and family support initiatives. Together with artists from Japan and abroad, we aim to create social impact through exchanging art experiences.
